Education

Aptech Konnagar Nov 2023 – Dec 2024
Open-Source Web App Development *Konnagar, West Bengal*

- **Relevant Coursework:** HTML, CSS, JavaScript, Angular, PHP, Bootstrap, jQuery

Indira Gandhi National Open University (IGNOU)
Bachelor of Arts in English (Honors) *Chinsurah, West Bengal*

Experience

Wiseboxs Softworks Pvt Ltd Jan 2025 – Oct 2026
Frontend Developer *Kolkata, West Bengal*

- Built scheduling and publishing features for Krafon, an AI-powered social media management SaaS, supporting Facebook, Instagram, Threads, LinkedIn, and YouTube using Vue 3 and Nuxt 4.
- Built a user activity tracking table from scratch, handling REST API integration, virtual scrolling, and frontend state management.
- Delivered a reporting filter panel end-to-end across 7 tasks within a single sprint.
- Built an associate panel module from scratch, including confirmation dialogs, division validation UI, and input field interactions.
- Developed a multi-step onboarding flow with step transitions, instructional popups, and account setup screens, iterating across multiple releases.
- Diagnosed and fixed a critical reactive data sync bug in a messaging module, traced to decoupled component state that left content stale across views during navigation.
- Contributed to live products in project management, social media, and ed-tech (student and admin apps), working daily with backend engineers, QA, and product managers in sprint cycles.

Projects

Crewbase | *Next.js 16*, *React 19*, *Prisma*, *PostgreSQL*, *JWT*, *bcrypt* In Progress

- Building a full-stack team access management app on the Next.js App Router, using Server Components for data fetching and Client Components for interactivity.
- Implemented custom JWT authentication from scratch, storing tokens in HTTP-only cookies and hashing passwords with bcrypt instead of using a third-party auth provider.
- Designed a relational schema with Prisma and PostgreSQL for Teams and Users, with indexing and automated seeding.
- Implemented role-based access control (Admin, Manager, User) with role-specific dashboards, enforcing permissions on the server by scoping Prisma queries to the requester's role.
- Used React 19 Server Actions with `useActionState` and `useTransition` for mutations that revalidate the UI without a full page reload.

Technical Skills

Languages: JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Libraries: Vue.js 3, React, Next.js, Vuetify, Shadcn ui, Tailwind CSS
Tools & Databases: Git, PostgreSQL,
Concepts: REST API Integration, JWT Authentication, Role-Based Access Control, Responsive Design, Agile/Sprint Workflow
