About Me

Frontend Developer with nearly 19 months of experience building and shipping production-ready interfaces across SaaS, team management, administration, and ed-tech products. Currently expanding into full-stack development.

Education

Aptech Konnagar Nov 2023 – Dec 2024
Open-Source Web App Development *Konnagar, West Bengal*

- **Relevant Coursework:** HTML, CSS, JavaScript, Angular, PHP, Bootstrap, jQuery

Indira Gandhi National Open University (IGNOU)
Bachelor of Arts in English (Honors) *Chinsurah, West Bengal*

Experience

Wiseboxs Softworks Pvt Ltd Jan 2025 – Aug 2026
Frontend Developer *Kolkata, West Bengal*

- Built scheduling and publishing features for Krafon, an AI-powered social media management SaaS, supporting Facebook, Instagram, Threads, LinkedIn, and YouTube using Vue 3 and Nuxt 4.
- Built a user activity tracking table from scratch, handling REST API integration, virtual scrolling, and frontend state management.
- Built an associate panel module from scratch, including confirmation dialogs, division validation UI, and input field interactions.
- Developed a multi-step onboarding flow with step transitions, instructional popups, and account setup screens, iterating across multiple releases.
- Diagnosed and fixed a critical reactive data sync bug in a messaging module, traced to decoupled component state that left content stale across views during navigation.
- Contributed to live products in project management, social media, and ed-tech (student and admin apps), working daily with backend engineers, QA, and product managers in sprint cycles.

Projects

Krafon | *Vue 3, Nuxt 4, TypeScript, Vuetify, Tailwind CSS* Live | Website

- Developed frontend features for an AI-powered social media management SaaS, enabling users to manage, schedule, and publish content from a unified dashboard.
- Built social media scheduling and publishing workflows for Facebook, Instagram, Threads, LinkedIn, and YouTube using Vue 3 and Nuxt 4.
- Handled end-to-end frontend development, including feature implementation, REST API integration, and UI development in collaboration with the backend team.
- Performed feature-level and end-to-end application testing to identify issues, validate workflows, and improve application reliability.
- Created and maintained technical documentation covering implemented features and application workflows.

Crewbase | *Next.js 16, React 19, Prisma, PostgreSQL, JWT, bcrypt* Source Code

- Built a full-stack team access management app on the Next.js App Router with Server and Client Components.
- Built custom JWT authentication from scratch using HTTP-only cookies and bcrypt, without a third-party provider.
- Designed a relational Prisma and PostgreSQL schema for Teams and Users, with indexing and automated seeding.
- Implemented RBAC (Admin, Manager, User) with role-specific dashboards, enforced via role-scoped Prisma queries.
- Used React 19 Server Actions with `useActionState` and `useTransition` for mutations that revalidate the UI.

Technical Skills

Languages: JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Libraries: React, Next.js, Vue.js 3, Nuxt, Vuetify, Shadcn ui, Tailwind CSS
Tools & Databases: Git, PostgreSQL, MySQL
Concepts: Component Architecture, Reactivity & State Management, SSR/CSR, Virtual Scrolling, Responsive Design, REST APIs, JWT Auth, RBAC, Agile
